the age of digital real estate

Investing in Domain Names

@DOJOMASTERYT
DIGIDOJO

Domain name

the part of a network address that identifies it as belonging to a particular domain.

Simplified

domain names are IP addresses that are converted to words to help us use them effectively.

Examples

www.example.com
www.donefordummies.com
www.areyoustilllost.com

Significance

domain names are the most valuable digital real estate on the internet. Without them, websites wouldn't have a place to exist on the world wide web.

@DOJOMASTERYT
DIGIDOJO

Domain flipping

the action of intelligently and purposefully buying domain names and selling them off again for massive profits.

Finding the right domain

don't just go out and buy random domains you think would be valuable. Do your research by studying their ages, traffic, backlinks, search volume and other crucial SEO data.

Flipping

before buying a domain, you should already have an idea of who you could sell it to for profit. Do everything with a purpose.
